Chat Alert Rule

Overview Configurations

Discord's your place to collaborate, share, and just talk about your day – or commiserate about app errors. Connect Sentry to your Discord server and get [alerts](#) in a channel of your choice or via direct message when sh%t hits the fan.

For Team billing plans and above

ENABLED

Assign, ignore, and resolve issues by interacting with chat messages.

Configure rule based Discord notifications to automatically be posted into a specific channel.

ISSUES

Issues are groups of errors that have a similar stacktrace. Set an alert for new issues, when an issue changes state, frequency of errors, or users affected by an issue.

ISSUE	EVENTS
☐ ForbiddenError fetchData(app/components/HoverCard) GET /projects/direct/backend/releases/v7210/404 BOTANAVOICE-34 21 hours ago – 2 days old 1.7k	
☐ IntegrityError fetchData(app/components/Table) GET /projects/direct/backend/releases/v7210 BOTANAVOICE-34 21 hours ago – 2 days old	
☐ NotFoundError fetchData(app/component) GET /projects/btc-direct/btcdirecteu-backen BOTANAVOICE-34 21 hours ago – 2 days old	

WHEN

A new issue is created

THEN

Send an email to Jane Schmidt

Examples

- When the triggering event's level is fatal.
- When an issue was seen 100 times in the last 2 days.
- Create a JIRA ticket when an issue changes state from resolved to unresolved and is unassigned.

Set Conditions

디코에 초대되었다면

자동으로 드랍박스에 서버명 나온다.

서버 내의 특정 채널을 입력해줘야한다.

New Alert Rule

1 Select an environment and project

All Environments

✔ javascript-vue

2 Set conditions

1 **WHEN** an event is captured by Sentry and **any** of the following happens

A new issue is created

Add optional trigger...

2 **IF** **all** of these filters match

Add optional filter...

3 **THEN** perform these actions

Send a notification to the **Memo** Discord server in the channel with ID or URL:

paste channel ID or URL and show tags e.g., environment,user,rr in the notification.

Note that you must enter a Discord channel ID, not a channel name. [Learn More](#)

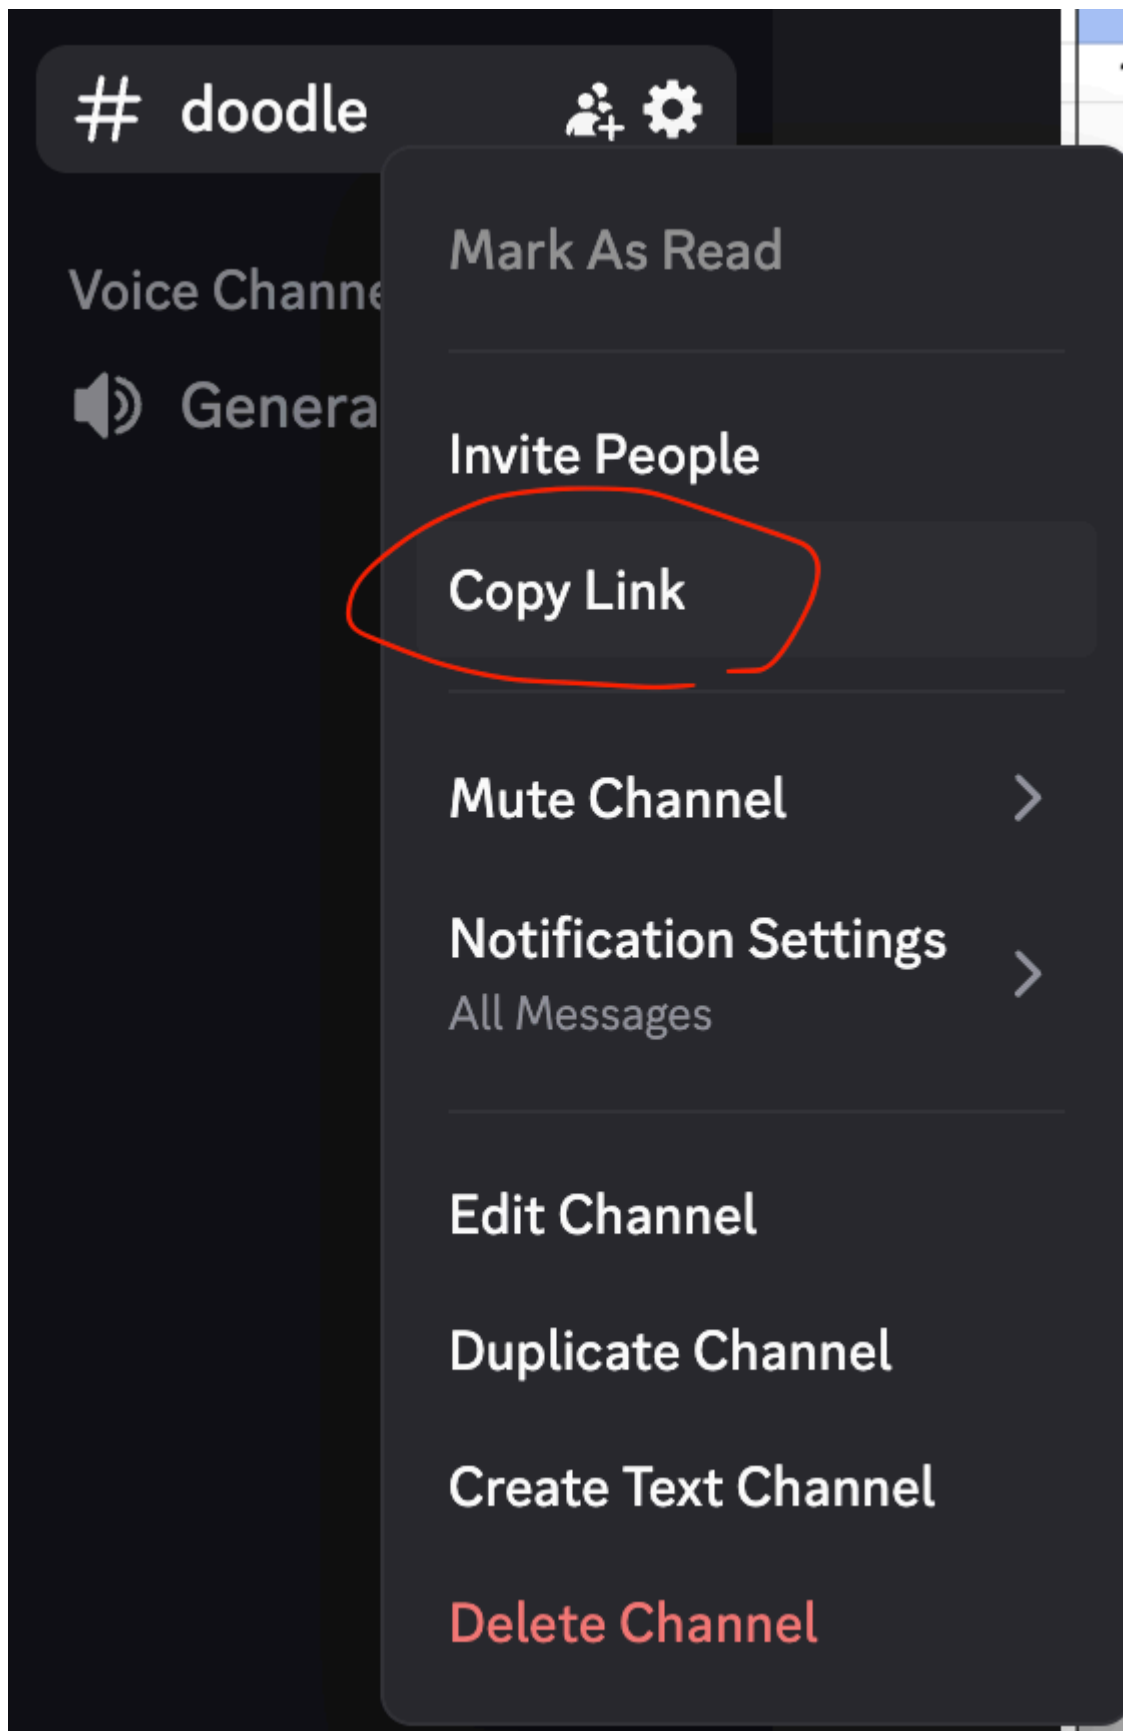

Add action...

Send Test Notification

3 Set action interval

Perform the actions above once this often for an issue
